2015 800x etec Stuttering and Engine Cutout at WOT

Question: My 2015 800x etec is stuttering and cutting out at wide open throttle (WOT). What could be the cause?

Answer: There are several potential causes for this issue:

- **Fuel starvation:** A dirty fuel filter, clogged fuel line, or faulty fuel pump can restrict fuel flow to the engine, causing stuttering and cutouts.
- **Electrical problems:** A loose or faulty electrical connection, such as a bad ground or loose wire, can disrupt the engine's ignition or fuel system, leading to stuttering and cutouts.
- **Engine cooling:** An overheated engine can lose power and experience stuttering or cutouts. Check the coolant level and ensure the cooling system is functioning properly.
- **Turbocharger issues:** A malfunctioning turbocharger can restrict airflow and cause the engine to stutter or cut out at WOT.
- **Software glitches:** In some cases, software issues with the engine's electronic control unit (ECU) can cause stuttering and cutouts.

Additional Tips:

- Inspect the spark plugs for fouling or damage.
- Check the throttle position sensor (TPS) for proper operation.

- Clean the throttle body to remove any carbon buildup.
- Run a diagnostic scan on the engine to identify any fault codes.
- If the issue persists, consult with an authorized BRP service dealer for professional diagnosis and repair.
