Procurement in the Supply Chain\*\*

### **Context of Procurement**

Procurement is the process of acquiring goods, services, or works from external sources to meet an organization's needs. It involves identifying, selecting, negotiating, and managing contracts with suppliers.

### **Four Stages of Procurement**

Traditionally, procurement is divided into four stages:

1. Planning and Requisitioning
2. Supplier Selection
3. Contract Management
4. Invoice Processing

1. Need Recognition
2. Supplier Selection
3. Request for Proposal (RFP)
4. Price Negotiation
5. Contract Award

6. Contract Management
7. Supplier Evaluation

### **Three Types of Procurement**

Based on the purpose of the acquisition, procurement can be categorized into three types:

1. Direct
2. Indirect
3. Services

Effective procurement organizations focus on the "5 P's":

1. Price
2. Product
3. Performance
4. Partnership
5. Process

The procurement cycle is a series of steps involved in the acquisition of goods or services, from identifying the need to final payment. The cycle includes:

1. Demand Forecasting
2. Supplier Selection
3. Order Placement
4. Goods Receipt
5. Invoice Processing

## **Difference Between Procurement and Purchasing**
