### **When You See the Invisible, You Can Do the Impossible**

In the tapestry of life, we are often blinded by the tangible realities that surround us. We focus on what we can see, touch, and hear, but we neglect the vast tapestry of the invisible world. It is in this hidden realm that lies the power to unlock our full potential and achieve the seemingly impossible.

- **Journaling:** Writing down our thoughts, feelings, and dreams can help us to identify and interpret patterns in our lives.
- **Spending time in nature:** Nature is a powerful source of inspiration and connection to the unseen world.

### **Seam Tape for Fleetwood RV: Questions and Answers**

**What is Seam Tape?** Seam tape is a waterproof material used to seal the seams of an RV's exterior, preventing water infiltration and protecting the interior from damage. Fleetwood RVs commonly use self-adhesive butyl tape for their seam sealing.

**Why is Seam Tape Important?** Seam tape is vital for the longevity and integrity of an RV. Water damage can lead to structural issues, mold growth, and even electrical hazards. Proper seam sealing prevents these problems by creating a waterproof barrier.

**When Should I Inspect and Replace Seam Tape?** Seam tape should be inspected annually or more frequently if the RV is exposed to harsh weather conditions. It should be replaced if it shows signs of cracking, peeling, or separation from the RV's exterior.

### **How to Inspect and Replace Seam Tape**

- **Inspection:** Use a flashlight to carefully examine all exterior seams. Look for any signs of damage or gaps.
- **Replacement:** Remove the old seam tape by carefully peeling it away. Clean the surface thoroughly with rubbing alcohol. Apply the new self-adhesive seam tape over the seam, pressing firmly to ensure a secure bond.

**Professional Seam Sealing** While it is possible to inspect and replace seam tape yourself, it is recommended to have it professionally done if you are not comfortable with the process. Professional RV technicians have the experience and equipment to ensure proper application and maximum protection.
