The Latest Answers to Oldest Questions: A Philosophical Adventure with the World's Greatest Thinkers

Nicholas Fearn delves into the timeless questions that have perplexed humankind for centuries in his thought-provoking book, "The Latest Answers to Oldest Questions." Through engaging dialogues with some of the world's most brilliant thinkers, Fearn explores the fundamental nature of our existence and the universe

we inhabit.

1. What is the nature of reality?

Plato argued that true reality lies in the realm of eternal Forms, while Aristotle believed it existed in the concrete world around us. Modern philosophers, such as David Chalmers and Thomas Nagel, have further explored the subjective nature of consciousness and the relationship between the mind and the external world.

2. What is the meaning of life?

Epicurus saw pleasure as the ultimate goal, while Socrates emphasized the pursuit of wisdom and virtue. Existentialists like Jean-Paul Sartre and Albert Camus grappled with the absurdity of life and the importance of creating meaning through our own actions.

3. What is the nature of the universe?

Aristotle believed in a geocentric universe, while Copernicus and Galileo proposed a heliocentric model. Modern cosmology reveals a vast and expanding universe, with theories ranging from the Big Bang to the multiverse.

4. What is the origin of morality?

Hobbes saw morality as a product of social contract, while Rousseau argued for an innate moral sense. Immanuel Kant believed in universal moral laws based on reason, while utilitarians like John Stuart Mill emphasized the greatest happiness for the greatest number.

5. What is the future of humanity?

Socrates warned of the dangers of hubris, while futurists like Ray Kurzweil speculate on technological advancements and the possibility of human extinction. Will we embrace our humanity or succumb to the temptations of scientific progress?

Fearn's book provides a comprehensive overview of these enduring questions, presenting the perspectives of philosophers, scientists, and thinkers from ancient Greece to the present day. It is an invitation to engage in the great intellectual debates that have shaped our understanding of the world and ourselves.
