What do Audi engine numbers mean? This system doesn't take into account the size of the engine, only the power output. In the simplest terms, the smaller the number, the less powerful the engine. So while a 35 TFSI is a 1.5-litre petrol engine and the 35 TDI is a 2.0-litre diesel engine, they both produce a similar amount of power... still with us?

What does DSG stand for? DSG stands for 'Direct-Shift Gearbox' (luckily enough, the German translation has the same initials – Direkt-Schalt Getriebe). Which is better 1.9 TDI or 2.0 TDI? General consensus is that the 1.9 was far more reliable. On newer models (mk5 Golfs onward) the 1.9 is still used for the lower powered cars, whilst the more powerful ones are the 2.0. With older Golfs there was a 130 and a 150 PD 1.9, which seem to generally be reckoned to be the most reliable.
