**What did Jung say about tarot?** The Tarot is also a tool for personal story telling and personal growth, the development of the Self. This process is called "Individuation" according to Jung. Divination can be described as accessing information from your subconscious mind to generate intuitive knowing in your conscious mind.

**Are Jungian archetypes based on tarot?** Ms. Nichols here quotes Jung himself on the topic: "The Tarot presents a pictorial representation of the archetypes." However, there is no evidence that Jung ever used the Tarot as a resource in analyzing his patients, as he made use of astrology for that purpose.

**What is the psychology behind Tarot cards?** The cards supposedly channel your spiritual wisdom; they uncover your deepest thoughts and consciousness. At least, that's the promise. Each believer thinks they're tapping into something more useful

or objective,” says psychology graduate student Spencer Mermelstein of UC Santa Barbara.

**What is an archetype in tarot?** Simply put, it's a set pattern of behavior. Archetypes “provide the foundation for your personality, drives, feelings, beliefs, motivations, and actions.” - Caroline Myss ([Click here to continue reading.](#))

**Are Jung's archetypes real?** The concept of archetypes is a key aspect of Jung's theory of the collective unconscious, which suggests that there are universal experiences that are inherent to the human experience. The existence of archetypes can be inferred from various cultural phenomena, such as stories, art, myths, religions, and dreams.

**What did Carl Jung say about archetypes?** Archetypes symbolize basic human motivations, values, and personalities. Jung believed that each archetype played a role in personality, but felt that most people were dominated by one specific archetype.

**Who created the 12 Jungian archetypes?** At the heart of this understanding, Carl Jung gifted us with a map — not of physical territories, but of psychological landscapes. Within this guidance, we discover the intricate patterns of our deepest motivations, fears, and desires — the archetypes that underpin the very foundations of our personalities.
