Is cell a credible journal? Cell is a peer-reviewed scientific journal publishing research papers across a broad range of disciplines within the life sciences.

What is a molecular cell? Molecular Cell aims to publish the best research in molecular biology. The journal covers core cellular processes. Molecular Cell is particularly interested in papers that answer longstanding questions, open new avenues of research, report unexpected findings, or change the way we think about biological processes.

Is Molecular Biology of the Cell a good book? Molecular Biology of the Cell is the classic in-depth text reference in cell biology. By extracting fundamental concepts and meaning from this enormous and ever-growing field, the authors tell the story of cell biology, and create a coherent framework through which non-expert readers may approach the subject.

Is cell an Elsevier journal? Our flagship journal, Cell, was launched by Benjamin Lewin in 1974 under the aegis of MIT Press. In 1986, Cell Press became established as an independent publisher and subsequently launched hallmark journals including Neuron, Immunity, and Molecular Cell. We joined the Elsevier family, our parent company, in 1998.
