**What are dinosaur dossiers in ARK: Survival Evolved?** You can find them scattered around the landscape of The Island, Scorched Earth, Aberration, and Extinction as collectables among other Explorer Notes. The dossiers tell you about the behavior and habits of all creatures present in ARK, written by the survivor Helena, who is mostly correct with her observations.

**How many dossiers are there in ARK?** Currently, there are 101 Creature Dossiers on The Island.

**What is an R dino ARK?** R-Creatures are variants of Creatures local to specific biomes of Genesis: Part 2, and are divided into two groups: Eden and Rockwell. In addition to having totally new color patterns and regions from their normal counterparts, they also have a 5% damage increase and 3% less health when tamed.

**How many Creatures in ARK: Survival Evolved?** To quickly find ARK Dossiers we've made online, I usually just Google the species' name such as "Doedicurus", first link. Win for Science?! There are 195 different species as well 301 variants, for a total of 496 various creatures to be found in different ARKs.

**What do Tek Rex do?** The tek rex is basically just a rex that is 20% more powerful in every way, and unlike the Giga it has no downside.

**What is the most damaging Dino in ARK?**

## **What is the biggest entity in Ark?**

**How to tame Rhyniognatha?** You need to kill a male and get the pheromone from its inventory. Then, bring one of your tames close to a female Rhyniognatha and feed your tame the pheromone. Attack the female Rhyniognatha until its HP gets less than 10% and after some attacks, it will impregnate your tame and flee.

**Where is the Carcharodontosaurus dossier?** This is for anyone having trouble finding the Carcharo dossier in ASA. It's at about 32.8, 85.1 but even so I couldn't find it without bringing a Dire Wolf, and couldn't find any other guides. It's under a ruin, behind a CORNER inside it.

**What is Dino vs Xeno?** Dino V. Xeno is a casual, straight to the point, yet deeply crafted tower defense game, where you can enlist 10 upgradable dinos, plus 14 additional special towers, to battle alien hordes. With randomized elements, 51 levels and 20-40 hours of gameplay, DVX is a tailor made for tower defense lovers.

**Can you tame R Giga?** Very easy tame, use 3 metal Dino gates with a bear trap in the middle, lead it in on foot then run around the back and close it up with a 4th. If you are taking a giga DO NOT pick up your trap until it is tamed.

**What is the coolest ARK dino?** The Argentavis is arguably the best creature on The Island in ARK: Survival Ascended due to its flexibility as a mount. Able to pick up and carry most medium creatures, including the Thylacoleo, the Argie makes the taming of these dinos incredibly easy.

**What is the most overpowered dinosaur in ARK?** Rex is, unsurprisingly, one of the strongest dinosaurs in the game. Since it has a high melee attack, it is useful in PvP and PvE fights. Also, this dinosaur doesn't disappoint when taking over bases during raids, especially if equipped with the Tek Rex Saddle. Their roar threatens enemies whenever they attack as well.

**What does imprinting a dino do?** A fully imprinted dinosaur ridden by whomever imprinted on it is capable of taking on enemies more than twice as powerful as it would've been unimprinted. All of its bonuses are multiplicative. 20% increased health means 20% more time to dish out damage.

**What does a dino leash do in ARK?** Electronic leash to keep your dinos from wandering too far. The Dino Leash is an item in Extinction.

**What does spaying a dino do in ARK?** Spay is an option on the action-wheel of a tamed dino. Once a female creature is spayed, it can no longer mate and thus is not able to be used in breeding ever again, but they can be cloned through the Tek Cloning Chamber.
