La Península Ibérica alberga una gran diversidad de setas, algunas de ellas comestibles y otras tóxicas. Identificar y clasificar correctamente las setas es esencial para disfrutar de una recolección segura y saludable. Esta guía proporciona un resumen completo de los principales hongos de la Península Ibérica, con consejos prácticos para reconocerlos y clasificarlos.

¿Qué son las setas?

Las setas son los cuerpos fructíferos de los hongos, que son organismos que se alimentan de materia orgánica en descomposición. Crecen en una gran variedad de hábitats, desde bosques hasta praderas, y desempeñan un papel vital en el ecosistema como descomponedores.

¿Cómo reconocer las setas?

Existen varias características clave que pueden ayudar a reconocer las setas:

- Sombrero: La parte superior de la seta, que puede variar en forma, tamaño y color.
- Láminas: Las estructuras debajo del sombrero que producen esporas, que suelen ser de color blanco, crema o rosado.

- Pie: La estructura que sostiene el sombrero, que puede ser hueco, sólido o fibroso.
- Anillo: Un resto del velo que solía cubrir las láminas, que puede ser persistente o fugaz.
- Vaina: Un tejido que envuelve la base del pie en algunas especies.

#### ¿Cómo clasificar las setas?

Las setas se clasifican en diferentes grupos en función de sus características morfológicas y de su forma de reproducción. Algunos de los grupos principales incluyen:

- Agaricales: Setas con sombreros y láminas, que incluyen tanto especies comestibles como tóxicas.
- Boletos: Setas con sombreros porosos en lugar de láminas, que suelen ser comestibles.
- Rusulales: Setas con sombreros frágiles y láminas que se rompen fácilmente, que incluyen especies tanto comestibles como tóxicas.
- Cantharellales: Setas con sombreros en forma de embudo y pliegues en lugar de láminas, que suelen ser comestibles.

### Precauciones y consejos

- Nunca recolectes o consumas setas de las que no estés 100% seguro de su identidad.
- Si tienes dudas sobre una seta, consulta con un experto o utiliza una guía de campo confiable.
- Consume las setas frescas y cocínalas completamente antes de comerlas.
- Evita recolectar setas cerca de carreteras, zonas industriales o áreas contaminadas.
