According to Ziglar, the ultimate goal of selling is not to make a sale but to create a customer. "The sale is only the beginning," he said. Salespeople should focus on delivering exceptional value and building lasting relationships with their customers. By doing so, they create a loyal customer base that drives repeat business and referrals.

# 4. How can you differentiate yourself from the competition?

Ziglar emphasized the importance of differentiation. He advised salespeople to identify their unique strengths and develop a compelling value proposition that sets them apart from their competitors. By delivering unique value, salespeople can attract and retain customers more effectively.

By following these principles, salespeople can build strong relationships, close more deals, and create lasting success in their careers.
