Is coffee a solution? At a very basic level, brewed coffee is a solution which results

from combining ground coffee beans and hot water. In this interaction, the coffee

beans operate as a solute, or substance which is dissolved to create a solution, and

hot water acts as a solvent, or the substance used to dissolve the solute.

What is solution in chemistry terms? A solution is a homogeneous type of mixture

of two or more substances. A solution has two parts: a solute and a solvent. The

solute is the substance that dissolves, and the solvent is the majority of the solution.

What is a solution your answer? A solution is a combination of liquid and solute

molecules that is homogeneous. Water, concrete or gaseous may be a solution. In

comparison, a combination of liquids, gases and solids may be a solution.

What is a solution answer key? A solution has two parts: a solute [SAHL-yoot] and

a solvent. The solvent is usually a liquid. The solute is what "disappears" in the

solvent. The solute may be a solid, a gas, or another liquid. A solution is formed

when the solute dissolves.

What is a solution in simple words? A solution is all about solving or dissolving. If

you find an answer to a question, both the answer and how you got there is the

solution. If you dissolve a solid into a liquid, you've created a different kind of

solution.
