What question did the French and Indian war answer? The French and Indian War began over the specific issue of whether the upper Ohio River valley was a part of the British Empire, and therefore open for trade and settlement by Virginians and Pennsylvanians, or part of the French Empire.

What was the French and Indian war fought between _____ and _____ as part of this larger war known as? The French and Indian War was the North American conflict in a larger imperial war between Great Britain and France known as the Seven Years' War.

What did Britain gain as a result of the war? Under the Treaty of Paris the French lost nearly all their land claims in North America and their trading interests in India. Great Britain gained Canada, all lands east of the Mississippi, and Florida.

Who won the French and Indian war _____?

What is the French and Indian War quizlet? The French and Indian War (1754-1763) was the North American theater of the worldwide Seven Years' War. The war was fought between the colonies of British America and New France, with both sides supported by military units from their parent countries of Great Britain and France, as well as Native American allies.

Who won the French and Indian War How do you know? Though Britain's victory in the French and Indian War expelled France from North America and secured

massive territorial gains for the empire, subsequent Crown policies concerning taxation and westward expansion resulted in widespread colonial discontent.

Who lost the French and Indian war? The war officially ended on February 10, 1763 with the signing of the Treaty of Paris, the French lost all of their North American possessions east of the Mississippi River. The British gained control of Canada and the Americans received the French's land and other possessions.

What did France lose as a result of the war? The Treaty of Paris of 1763 ended the French and Indian War/Seven Years' War between Great Britain and France, as well as their respective allies. In the terms of the treaty, France gave up all its territories in mainland North America, effectively ending any foreign military threat to the British colonies there.

Who actually fought in the French and Indian war? The French and Indian War was fought between Great Britain and France and their colonists, as well as Native American tribes. They fought over territories and expansion throughout North America.

Who won the 7 Years' war? Fought between 1756 and 1763, this conflict can claim to be the original 'world war'. Franco-British fighting in North America and India became part of a general war in Europe. Britain's subsequent victories around the globe consolidated what has been called the 'First British Empire'.

Why did Native Americans fight? On the Western Plains, pre?Columbian warfare—before the introduction of horses and guns—pitted tribes against one another for control of territory and its resources, as well as for captives and honor. Indian forces marched on foot to attack rival tribes who sometimes resided in palisaded villages.

What land did France lose in the French and Indian War? The French and Indian War ended with the signing of the Treaty of Paris in February 1763. The British received Canada from France and Florida from Spain, but permitted France to keep its West Indian sugar islands and gave Louisiana to Spain.

Why salutary neglect? salutary neglect, Policy of the British government regarding its North American colonies under which trade regulations for the colonies were laxly

enforced and imperial supervision of colonial affairs was loose as long as the colonies remained loyal to Britain and contributed to its economic profitability.

Why did the British tax the colonists? The British needed to station a large army in North America as a consequence and on 22 March 1765 the British Parliament passed the Stamp Act, which sought to raise money to pay for this army through a tax on all legal and official papers and publications circulating in the colonies.

What were the three causes of the French and Indian war? Through collaborative research and reporting activities, students will be able to identify and describe in detail five major causes of the French and Indian War: conflicting claims between Great Britain and France over territory and waterways, beaver trade, religious differences, control of the Grand Banks, and ...

What happened as a result of the French and Indian war? The main result of the French and Indian War was the British seizing control of the eastern half of North America after the French surrendered their holdings. This included a large part of modern day Canada and all formerly French territories east of the Mississippi River.

Why did the Native Americans side with the French? Indigenous peoples pursued these alliances with the French as a means of securing a wide range of European manufactured goods, but cloth, firearms, and metal weapons were among the most sought after. By the early 1700s, the fur trade was firmly established in the Great Lakes region.

What best describes the French and Indian war? The French and Indian War was fought between the British and French in North America from 1754 to 1763. The war started when the British colonists seized control of the French fort at Louisbourg in 1758. This marked the beginning of a larger conflict that involved other major European powers and Native American tribes.

What ended the American Revolution? The Treaty of Paris was signed by U.S. and British Representatives on September 3, 1783, ending the War of the American Revolution.

Why did the British colonies fight? Each colony had its own government, but the British king controlled these governments. By the 1770s, many colonists were angry

because they did not have self-government. This meant that they could not govern themselves and make their own laws. They had to pay high taxes to the king.

What was the most important part of the French and Indian war? The last and largest major engagement of the French and Indian War would be the Battle of Quebec in 1759. The British victory at Quebec allowed the English to take control of most of North America.

Which is a result of the French and Indian War responses? What happened as a result of the French and Indian War? The Treaty of Paris ended the French and Indian War in 1763. It gave Florida and territory west of the Mississippi River to the British. Spain ceded control of Florida in exchange for America ceding control of Cuba.

What would the French and Indian War decide? The French and Indian War ended with the signing of the Treaty of Paris in February 1763. The British received Canada from France and Florida from Spain, but permitted France to keep its West Indian sugar islands and gave Louisiana to Spain.

What was the French and Indian War for dummies? The French and Indian War was fought between 1754 and 1763 in British North America and French North America. They fought over land which is now in the United States and Canada. The French had some Native American allies and the British had other allies.
