How do I know what model Mercury outboard I have? All Mercury outboard engines either have an identification tag or an instruction plate that contains the serial number. The ID tag is located on either side of the swivel bracket (or transom bracket), and the instruction plate is located between the thumb screws above the steering tube.

What is considered high hours on a Mercury outboard? So a boat just sitting in a dock for months will not accumulate many engine hours, while one out cruising and fishing will. Most boat experts say that 1500 hours on a boat is considered a lot.

What is the life expectancy of a Mercury outboard motor? Mercury Marine Engines offer a wide selection of outboard motors that range from 2.5 to 600 hp. With the right amount of care and maintenance, you can expect a new Mercury outboard motor to last up to 3,000 hours.

How can I tell the year of my outboard motor? Not sure about the year of your outboard motor The serial number can help you determine the year of your engine. Your serial number or model number can be found on the engine's mid-section. Often this plate is also marked with the engine's year too.

How can I tell what year my engine is by the serial number? The date code for the engine is built into the serial number after the first two numbers. As an example, a 2013 engine would read something like this, 1013426. The "13" designates it as a 2013 engine.

Can you tell a year by a serial number? For the serial number the typical format is to have the 4th, 5th, and 6th characters to reference when the product was built. The first character is the year date (Y) and the next two (WW), the week in that year it was made. Hope this helps you and anwsers your questions.

What are the different types of Mercury outboards?

How do I know if my Mercury outboard is 2 or 4 stroke? It really comes down to how the cylinders are lubricated. 4-stroke outboards have internal oil reservoirs and sumps which need regular oil level checks, filter replacements and oil changes at least annually. 2-stroke outboards generally have an external oil tank with the oil and fuel mixture injected into the cylinder.

Is 500 hrs a lot for an outboard? If you have kept up with the service schedule, and your boat has between 500-1,000 hours, you probably won/'t need to replace the engine for at least the next 5 to 7 years, depending on how often you use it. In most cases, they start to run rough and begin showing signs of wear and tear.

Do 2 stroke or 4 stroke outboards last longer? The outboard motor life will vary with different types of boat motors: The old 2 stroke outboards had an expected lifetime of 1500 hours, while the modern 4 strokes are expected to have 4000 hrs.

How long can a boat engine sit without running? As long as it's well maintained before going into storage, a boat can sit for a few months, a few years or even a few decades. Neglecting to prep it for storage, though, will necessitate massive repairs or even a total rebuild.
