SQL Practice Problems with Solutions: Enhance Your Skills

SQL (Structured Query Language) is a powerful tool for data manipulation and retrieval, widely used in database management systems. To master SQL, it's essential to practice solving problems to improve your understanding and proficiency. Here are five practice problems with detailed solutions:

Question 1:

Retrieve the names of all customers who ordered products from a specific category, 'Electronics'.

```
SELECT customer_name
FROM orders
JOIN products ON orders.product_id = products.product_id
WHERE products.category = 'Electronics';
```

Answer:

This query uses a JOIN to link the 'orders' and 'products' tables and filter the results based on the 'Electronics' category.

Question 2:

Find the total number of products that have been sold.

```
SELECT SUM(quantity)
FROM order_items;
```

Answer:

This query aggregates the 'quantity' column, which represents the number of units sold for each order item, to calculate the total number of products sold.

Question 3:

Retrieve the names of employees who work in the 'Sales' department and have earned a salary above $50,000.

```
SELECT employee_name
FROM employees
WHERE department = 'Sales' AND salary > 50000;
```

Answer:

This query filters the 'employees' table by department and salary to identify employees who meet the specified criteria.

Question 4:

Update product prices by increasing them by 5%.

```
UPDATE products
SET price = price * 1.05
WHERE price IS NOT NULL;
```

Answer:

This query increases product prices by multiplying their original values by 1.05.

Question 5:

Write a subquery to find the top three best-selling products.

```
SELECT product_name
FROM products
WHERE product_id IN (
    SELECT product_id
    FROM order_items
    GROUP BY product_id
    ORDER BY SUM(quantity) DESC
    LIMIT 3
);
```

Answer:

This query uses a subquery to identify the product IDs of the top three best-selling products, which are then used to retrieve the corresponding product names from the 'products' table.
