**What is communities of practice learning?** Communities of practice are formed by people who engage in a process of collective learning in a shared domain of human endeavor: a tribe learning to survive, a band of artists seeking new forms of expression, a group of engineers working on similar problems, a clique of pupils defining their identity in the school, a ...

**What is the identity of the community of practice?** The domain: A community of practice is not merely a club of friends or a network of connections between people. It has an identity defined by a shared domain of interest. Membership therefore implies a commitment to the domain, and therefore a shared competence that distinguishes members from other people.

**What is the concept of community of practice?** A community of practice (CoP) is a group of people who share a common concern, a set of problems, or an interest in a topic and who come together to fulfill both individual and group goals.

**What are the three elements of communities of practice?** The three essential elements of a community of practice (shown in the middle column) contain the domain, community, and practice and must all be identifiable within a community in order to use the Communities of Practice framework.

**What is an example of a community of practice?** These are informal groups of individuals united by a shared hobby or interest. This could be a local gardening club or an online gaming community of practice. ? Communities of practice focus on the joy of shared interest, personal growth, and mutual support.

**What was Wenger's theory?** In the early 20th century, Wegener published a paper explaining his theory that the continental landmasses were "drifting" across the Earth, sometimes plowing through oceans and into each other. He called this movement continental drift.

**What is community learning theory?** Community-Based Learning (CBL) is a teaching strategy that bridges academic theory and real-world practice. CBL promotes students' academic learning and civic development while simultaneously addressing real world problems, community needs and interests.

---

**What is the social theory of learning communities of practice?** The fundamental idea of Communities of Practice (CoPs) is that learning is ongoing and social rather than discrete and individual. This idea has its origins in social learning theory, which explores how people learn in a social setting (Bandura 1977).

**How to establish a community of practice?**

**How do members of a specific domain interact and engage in a community of practice?** Members of a CoP interact through collaborative activities, helping each other, and sharing information, rather than through competitive or isolated means. The members of a Community of Practice are called practitioners, who are individuals actively involved in the shared domain.

**What does commitment to the CoP domain require?** Step 3: Explain Commitment to the CoP Domain Commitment to the CoP domain requires membership, which involves active participation and engagement in the shared activities and interests of the group.
