What is Casa 295 ICAO code?

What is the aircraft specification of C295? The military transport aircraft has a capacity of 10-tonnes and can speed up to a maximum of 480 kmph. The C-295 MW can transport 71 troops, 50 paratroopers, five standard pallets and 24 healthcare units. The C-295 can be used for mid-air refuelling of fixed wing aircrafts and helicopters.

How much does the CASA C-295 cost? The type of aircraft is believed to be the CASA C-295. The aircraft, which is expected to cost around $53 million, will be used for transporting troops and vehicles on international missions, as well as rescuing stranded Irish citizens.

What is the difference between CN-235 and C-295? CN-235 was the start of the family of aircraft, and is the shortest of the two main models. Compared to the bigger C-295 it has four blade propellers, a single wheel nose gear as standard and a rudder that extends to the top of the vertical stabiliser.

What weapons are in Casa 295? In the maritime patrol version the C-295 is fitted with a wide range of sensors that include radar, optics, sonobuoys and sigint equipment. A range of lightweight torpedoes for use against submarines can be carried under the wings. Anti-ship missiles can be fitted for surface targets.

Who uses the C-295?

How fast is the Casa 295? It is capable of carrying up to nine tonnes of payload or as many as 71 troops at a maximum cruise speed of 260 kts.

What aircraft is 295? The CASA, now Airbus C295 is a medium transport aircraft that was developed from the CN-235 medium transport which was originally developed for the Spanish and Indonesian Air Forces.
What is the deal of C295? India formalised the acquisition of 56 Airbus C295 aircraft to replace the Indian Air Force (IAF) legacy AVRO fleet, in September 2021. Under the contractual agreement, Airbus will deliver the first 16 aircraft in 'fly-away' condition from its final assembly line in Seville, Spain.

What is the ICAO code for Casa 235? CN35. The CASA/IPTN CN-235 is a medium-range twin-engined transport plane that was jointly developed by CASA of Spain and IPTN of Indonesia as a regional airliner and military transport. Its primary military roles include maritime patrol, surveillance, and air transport.

What is the ICAO flight code? ICAO code consists of 4 letters. Certain classifications among countries and regions are used in creating these codes. The first letter stands for the region in which the airport is located, the second is for the country. The other two letters are generally given in order.

What do ICAO codes mean? The International Civil Aviation Organization (ICAO) Code is a system of four-letter airport codes used primarily for operational and technical purposes in the aviation industry.

What is the ICAO aircraft address code? The ICAO ID (also called ICAO 24-bit address or 'HEX Code') is a unique identification number, which is different for each aircraft. It is used in the transponder, but also in the ELT, i.e. whenever an aircraft needs to be uniquely identified.
