How to make a good UI design in Android?

What is the user interface in an Android application? A mobile UI (mobile user interface) is the graphical and usually touch-sensitive display on a mobile device, such as a smartphone or tablet, that allows the user to interact with the device's apps, features, content and functions.

How can I make my UI design more interesting?

Which tool is best for UI design?

Which UI is best in Android?

What is fundamental UI design in Android? Android provides several common UI controls, widgets, and layout managers. For most graphical applications, it's likely that you'll need to extend and modify these standard controls — or create composite or entirely new controls — to provide your own functionality.
What are the 4 user interfaces? Graphical User Interfaces (GUI) Command Line Interfaces (CLI) Form-based interfaces. Menu-based interfaces.

How to make custom UI for Android?
