Which is the leading enterprise Kubernetes platform? 8: Red Hat OpenShift Red Hat OpenShift, the industry's leading hybrid cloud application platform powered by Kubernetes, brings together tested and trusted services to reduce the friction of developing, modernising, deploying, running, and managing applications.

What replaces Kubernetes?

Is Kubernetes like Docker? While Docker is a container runtime, Kubernetes is a platform for running and managing containers from many container runtimes. Kubernetes supports numerous container runtimes including Docker, containerd, CRI-O, and any implementation of the Kubernetes CRI (Container Runtime Interface).
