What is the Irish famine summary? Between 1845-52 Ireland suffered a period of starvation, disease and emigration that became known as the Great Famine. The potato crop, upon which a third of Ireland's population was dependent for food, was infected by a disease destroying the crop.

What is the real story of the Irish famine? The proximate cause of the famine was the infection of potato crops by blight (Phytophthora infestans) throughout Europe during the 1840s. Blight infection caused 100,000 deaths outside Ireland and influenced much of the unrest that culminated in European Revolutions of 1848.

Why did the Irish famine happen? Great Famine, famine that occurred in Ireland in 1845–49 when the potato crop failed in successive years. The crop failures were caused by late blight, a disease that destroys both the leaves and the edible roots, or tubers, of the potato plant.

What is the Irish play about the famine? Confined to the belly of the ship, Belfast Girls follows the characters as they leave famine-torn Ireland in search of a better life. The play by Jaki McCarrick has been staged internationally but this run marks its Irish premiere, with shows in Dundalk, Belfast, Drogheda and Navan.

Why didn't the Irish eat other food during the potato famine? Many Irish families re- lied on potatoes as their main source of food. Irish farmers grew other crops too, but everything else was sent to England to pay the farmers' rent. The Irish farmers did not have anything to eat when the crops were bad.

How did the Irish eat potatoes? The Irish had a peculiar way of cooking potatoes 'with and without the bone or the moon' (Wilde 1854:131). This method of cooking the potato pertained to par boiling the potato leaving the core undercooked and was

the preferred meal for a labourer with a day's work to do.

Why did the Irish not fish during the famine? during the famine years? "the fisheries of Iraland, were undeveloped, and in Galway and Mayo the herring fishermen were too poor to buy salt with which to preserve a catch.

What stopped the Irish famine? The "famine" ended in 1849, when British troops stopped removing the food. While enough food to sustain 18 million people was being removed from Ireland, its population was reduced by more than 2.5 million, to 6.5 million.

Who saved the Irish from the famine? During 1846–47, the Quakers gave approximately £200,000 for relief in Ireland. The British Relief Association, founded in 1847, also raised money in England, America and Australia. They received about £400,000. This money included donations from people who were themselves poor and marginalized.

Why did the Irish blame the English for the famine? Far from being a natural disaster, many Irish were convinced that the famine was a direct outgrowth of British colonial policies. In support of this contention, they noted that during the famine's worst years, many Anglo-Irish estates continued to export grain and livestock to England.

Could the Irish famine have been prevented? Yes, the Great Famine (Ireland) 1845 to 1852 could have been avoided. The problem was not solely that of the potato blight, for Irish farms produced other crops. The problem was that landowners exported these crops. Whereas these exports could have been curtailed, they were not.

Why was Ireland poor before the famine? Economic backwardness and the failure of the population to recover in the post-famine period suggest that Ireland's pre-Famine malaise was, at least in part, caused by overpopulation and thus that Ireland would have been in a less precarious position in 1845 had the population been lower.

What did the Irish eat during the Irish famine? Scientific analysis of dental calculus – plaque build-up – of victims found evidence of corn (maize), oats, potato,

wheat and milk foodstuffs. The corn came from so-called Indian meal imported in vast amounts to Ireland from the United States as relief food for the starving populace.

What was the worst time in Irish history? Ireland had its worst famine in 1845 when a famine called the Great Famine occured. It lasted until about 1850 but the worst years were between 1845 and 1849. It is estimated that almost one million people died and another million Irish people emigrated by the end of the famine.

What is the famous book about the Irish famine? First-person accounts and news stories help convey the incredible devastation of the Irish Potato Famine, and its impact on Ireland, where many died or immigrated, and the U.S., which absorbed many of the refugees.

Did people eat each other in the Irish famine? Fasughadh Laigen uile (acht beg) & a sgaoiledh fo Eirinn ar gorta (Great famine in the spring so that a man would sell his son and his daughter for food and men would even eat one another, and dogs. All Leinster was almost emptied, and scattered throughout Ireland on account of the famine).

What was the truth behind the Irish famine? As the people became too weak to labour, British and Anglo-Irish landlords evicted them from their miserable dwellings, leaving them at the mercy of the elements. One and a half million Irish people starved to death, while massive quantities of food were being exported from their country to Britain.

Why was the Irish famine so bad? The potato crop was ruined, destroyed (we learned later) by the fungus Phytophthora infestans. Over especially the next 2 years, life was miserable. We were always hungry and lost weight. England gave us some Indian corn and maize, but it was poorly ground and caused abdominal pain and diarrhea.

What disease caused the Great Famine in Ireland? Abstract. Phytophthora infestans is a destructive plant pathogen best known for causing the disease that triggered the Irish potato famine and remains the most costly potato pathogen to manage worldwide.

What was the greatest famine in history? Widely considered the largest famine in human history, the Great Chinese Famine led to an estimated 30 million deaths from starvation, and an estimated 33 million births were lost or postponed.

How many potatoes did the average Irish worker eat each day? In the course of their three meals per day, adult males consumed 12 to 14 pounds of potatoes per day! Women and children over the age of 10 ate about 11 pounds of potatoes each day; younger children ate about five pounds of potatoes per day.

Who helped Ireland during the famine? Ireland never forgot how Ottoman Sultan Abdulmejid I sent money, shipfuls of food to suffering Irish during Great Famine. Potatoes have a special place in Irish culture, as for centuries the people of the Emerald Isle have depended on this tuber as a diet staple.

Why did the Irish come to America after the potato famine? Mass evictions, the near-famines of 1861-1864 and 1879-82, and the hardships of subsistence farming meant emigration to North America continued to be seen as an opportunity to support and improve life.

What happened to the Irish after the potato famine? As a direct result of the famine, the Irish population was reduced by half, from eight million to four million, through death and emigration; vast emigrant communities were established in Canada, Britain, the US and Australia; the Catholic church emerged as a dominant political and cultural force; English replaced ...

Why are there no photos of the Irish famine? Photographs of the Great Famine in Ireland (1845 – 1852) and famine victims are scarce because photography was a relatively new invention at the time. The equipment needed to produce photographs was expensive and thus only the wealthy classes had access to it.

Why didn't England help Ireland during the potato famine? With such a difference, the Irish population would have extreme difficulty in purchasing any of the relief measures from the British government. Britain had failed in saving the Irish population because they were too busy trying to not lose any resources or money.

Did the Catholic Church help during the Irish famine? Catholic Church Local priests and ministers were widely praised for their role in helping the poor. Some

established their own relief committees to raise funds. The two Catholic bishops who were particularly involved were Archbishop Murray of Dublin and Archbishop MacHale of Tuam.

The Politics of India Since Independence: An Analysis by Paul R. Brass

1. What is the central thesis of Paul R. Brass's work on Indian politics since independence?

Brass argues that Indian politics is characterized by the interplay of four major factors: (1) the legacy of colonial rule, (2) the social and economic diversity of the country, (3) the role of the state, and (4) the emergence of political parties.

2. How does Brass explain the importance of the colonial legacy?

Brass contends that British colonialism left a profound impact on Indian society and politics. The centralized administration, the rise of a secular elite, and the introduction of Western ideas and institutions all shaped the post-independence landscape.

3. What is the significance of social and economic diversity in Indian politics?

Brass emphasizes that India is a highly diverse country, both in terms of social and economic factors. This diversity has led to the formation of various interest groups and political parties, often representing specific castes, ethnicities, or economic sectors.

4. How does the state play a role in Indian politics?

Brass argues that the Indian state has been a powerful force in shaping politics. The central government has played a significant role in economic planning, infrastructure development, and social welfare programs. This has created a patron-client relationship between the state and various political actors.

5. What is the role of political parties in Indian politics?

Political parties have been crucial in mobilizing electoral support and aggregating interests. Brass discusses the rise of the Congress Party and the Bharatiya Janata Party (BJP) as dominant forces in Indian politics. He also analyzes the fragmentation

of the party system and the emergence of regional parties.

World Mythology: Unveiling the Tapestry of Human Imagination

World mythology encompasses the vast and diverse collection of myths, legends, and folk tales created by cultures throughout history. These stories provide a window into the human experience, reflecting our hopes, fears, beliefs, and values.

What is the Purpose of Mythology?

Mythology serves multiple purposes:

- **Explaining the World:** Myths often attempt to explain the origins of the universe, humanity, and natural phenomena.
- **Guiding Behavior:** Many myths provide moral lessons or guidelines for behavior within a society.
- **Entertaining:** Mythology also offers escapism and entertainment, capturing the imagination through its fantastical characters and epic tales.

How is Mythology Structured?

Mythologies typically feature a pantheon of gods and goddesses, each with their own domains and powers. These deities often interact with humans, shaping their lives and destinies. Myths also often involve heroes, tricksters, and other archetypal characters who embody various human qualities.

What are the Common Themes in Mythology?

Despite the vast diversity of mythologies across cultures, certain themes recur frequently:

- **Creation:** Myths often describe the origins of the universe and living beings.
- **Good vs. Evil:** Many myths feature a struggle between benevolent and malevolent forces.
- **Love and Loss:** Love, heartbreak, and the cycle of life and death are common elements in mythological stories.

- **Transformation:** Myths often explore the transformative power of events and experiences.

How Can We Learn from Mythology?

Studying world mythology can offer valuable insights into:

- **Human Nature:** Myths reflect the universal human experiences that unite us.
- **Cultural Diversity:** Mythology provides a glimpse into the beliefs and values of different cultures.
- **Inspiration:** Mythological stories can inspire creativity, provide guidance, and spark personal growth.
