Section 1 Quiz: Understanding Demand

Answer Key

Paragraph 1:

- **Question:** Define demand.
- **Answer:** Demand is the quantity of a good or service that consumers are willing and able to purchase at a given price.

Paragraph 2:

- **Question:** Explain the law of demand.
- **Answer:** The law of demand states that, all else being equal, as the price of a good or service increases, the quantity demanded decreases.

Paragraph 3:

- **Question:** Identify the factors that shift the demand curve.
- **Answer:** Factors that shift the demand curve include: income, tastes and preferences, the number of buyers, the price of related goods, and consumer expectations.

Paragraph 4:

- **Question:** Explain the distinction between a change in quantity demanded and a shift in the demand curve.
- **Answer:** A change in quantity demanded refers to a movement along the demand curve, while a shift in the demand curve indicates a change in the position of the entire curve.

Paragraph 5:

- **Question:** Provide an example of how a shift in the demand curve can occur.
- **Answer:** If consumers suddenly develop a preference for a particular product, the demand curve for that product would shift to the right.
